

MONUM

MAXIM SUPER WHITE

Distinguished super white paint based on Lafarge NHL 2 for interior and exterior use on old and new substrates, like stone, bricks, lime plaster or concrete.

High class design with natural paint	Doesn't create deformation and cracks
Elegant colour of whiteness 91-92	Fast and easy brushing application
Breathing paint, allows vapour evaporation	Compatible with natural pigments
Avoids humidity in interior spaces	Easy repair and renewal
Anti fungus and bacterial development	Low cost

General description

2 part paint: 5 kg NHL powder + 10 liters water emulsion of Acryl 33 + Potassium Alum

Substrate Preparation

The substrate must be clean of dust and loose particles.
Before application, proceed generous wetting of the wall.

Material Preparation

Pour the liquid on the powder and mix thoroughly until you obtain homogeneity.
Hydraulic lime mixture viscosity increases during time and requires remixing.

Pigment saturation limits: Natural Pigments 25% of lime weight, Oxides 15%

Coverage: approx 90 g of NHL 2/m²

Equipment: Animal hair brush, width range 18 – 25 cm

Application

Brush in shadowed place, avoid wind, at temperatures between +5°C to +30°C.
Apply regularly vertical passes, using a wide brush to ensure good penetration.
In order to obtain high quality finish, apply second layer 24 hours after the first.

User is responsible of product compatibility for intended use and application.
Supplier's only obligation is to replace the product quantity proved defective.
